InterimID™
By Standard Register Healthcare

System downtime. No one questions if it will happen. It's only a matter of when.
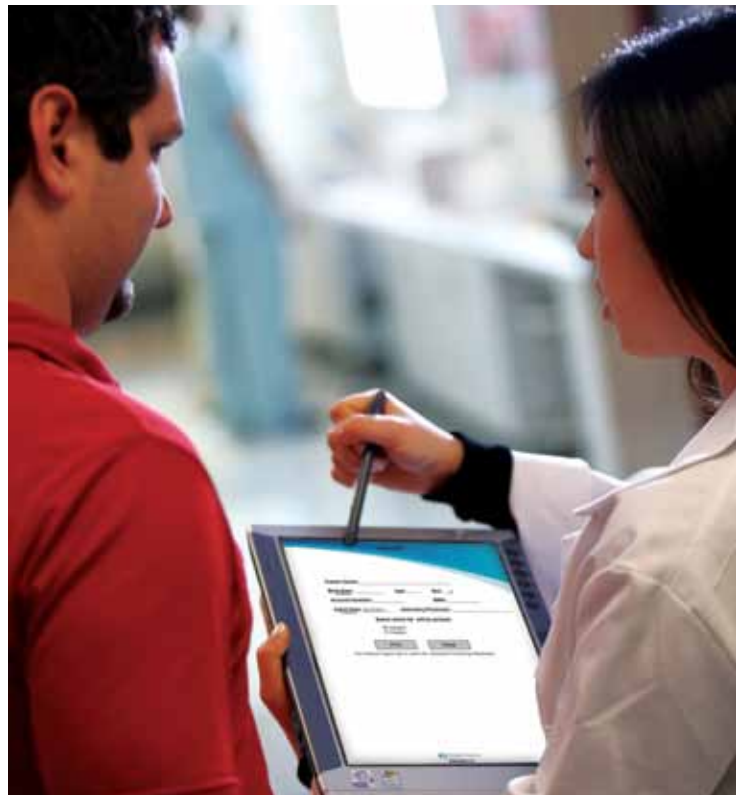

The critical question is how will you handle registration in the interim? What will you do to identify patients and manage their documentation when your system or network is down for maintenance or goes down unexpectedly?

If you're like a lot of healthcare providers, your staff is probably reverting to handwritten patient ID bands and paper documents. You can't blame them, but the reality is manual processes are error-prone and seriously undermine your efforts to establish positive patient identification and safe care!

InterimID™, a Simple, Indispensable Desktop Solution

Standard Register Healthcare provides you with a **simple** downtime solution for patient identification. We call it InterimID, but you'll call it **indispensable** because InterimID offers you an easy way to generate and print barcodes on wristbands and labels as patients are admitted.

- *Stand-alone application resides on the desktop, no server required*
- *Works whether you experience an HIS or network downtime*
- *It's easily accessible to staff, friendly user interface allows easy entry of patient information*
- *Then in a matter of keystrokes, barcoded patient ID bands and labels are printed*
- *All SR laser wristband and label layouts are supported*
- *Easily configured to print them to the correct printer tray*

InterimID™
By Standard Register Healthcare

Easily Configurable to Support Enterprise and Unit Needs

InterimID keeps it simple, flexible, cost-effective:

- *No expensive project management costs*
- *Password-protected administration page allows easy configuration*
- *Supports both linear and 2-D bar code configurations*
- *Easily accommodates individual department needs*
- *Configure to print up to three kits of different labels and ID bands per patient, based on individual patient needs*

Maintain Workflow Processes, Uninterrupted

Though system or network is down, InterimID helps maintain workflow processes without disruption.

- *Registration proceeds, without delay or inconvenience for the patient*
- *Positive patient identification is established at the outset*
- *Barcoded labels and IDs improve legibilty and accuracy so downstream workflows proceed uninterrupted*
- *When system or network is back up, barcoded documents easily scanned into the patient's EMR*

We make it seamless
for the patient,
more efficient for your staff,
cost effective for you.

Advance Your Reputation

Standard Register Healthcare is a recognized leader in managing healthcare information and communications. We have nearly a century of experience in healthcare and a commitment to deliver solutions to help healthcare providers accelerate performance, attract and educate patients, enhance their safety, and improve the quality of care.
